

company information

cryopen.

CryoPen, Inc.

was formed from Cimex Medical Innovations, L.C. a medical device R & D company. Under the direction of Dr. Michael J Haas, CryoPen strives to provide the latest innovations in skin care treatments.

Cimex Medical Innovations, L.C. was founded in 1996. Cimex was created because of the importance of connecting the needs of the medical world with the expanse of engineering knowledge.

The corporate office of CryoPen, Inc. is located in Corpus Christi, Texas with satellite offices located in Dallas, Texas and Covington, Louisiana.

The CryoPen

uses the latest in technology and was designed to replace current and outdated cryosurgical devices. The CryoPen offers the latest innovations in cryosurgical technology since the 1980's.

With this cutting edge technology, the CryoPen is highly accurate with its pen-point precision and consistent freeze temperatures for effective skin lesion removal.

The CryoPen is not technique dependent and will not damage surrounding tissue. The CryoPen Cryosurgical System is simple, safe, and effective.
