This information is provided to assist you in determining possible codes for procedures performed and are presented as examples only, as allowed charges will vary from state to state and carrier to carrier. Please check your current coding book for a more extensive list and for any coding changes.

Lesions that are not normally approved for reimbursement, may be approved if one or more things are documented in the medical record:

1. The lesion has bleeding, intense itching or pain, inflammation, obstructs an orifice or obstructs vision.
2. If it's in an anatomical region subject to recurrent physical trauma and documentation that such trauma has occurred.
3. Periocular (eye) warts with chronic conjunctivitis secondary to the virus.
4. Warts showing evidence of spread from one body area to another (particularly in immunosuppressed patients).
5. Cervical dysplasia or pregnancy associated with genital warts.
